

## Safety all ways, safety always

Safety is a foundation principle for child and youth care. Keeping young people safe, staying aware and guiding may seem straightforward for any caretaker, as it should be. For many youth at risk, safety is a unique experience they may have never known or come to appreciate. Your interventions may be viewed as intrusions, interruptions and perhaps just plain silly. It takes time and work on your part to develop the self esteem and sensitivity in them to practice safety.
